

# COMP 285 (Fall '22) Homework 0 (100 pt)

---

Logistics + Getting to Know You

Due 08/25/22 @ 11:59PM

---

## Submitting

---

In order to submit this assignment, you must download your assignment as a ZIP file and upload it to [Gradescope](#) (setup instructions below). There is only a written component.

---

## Question 1: Course Policies (10pt)

---

(10 pt) Have you thoroughly read the course policies on the webpage [here](#)?

Write your (Y/n) answer in `q1.txt`.

## Question 2: Course Diagnostic (30pt)

---

(30 pt) We've prepared a course diagnostic to get a sense of where each of you is in the course. The course diagnostic is graded purely on completion (there are no wrong answers).

Go to [this form](#) to open the course diagnostic.

The form asks for your name and NC A&T email, and we will use this to verify your submitted.

## Question 3: Getting to know you! (20 pt)

---

(10 pt) To start, please fill out this [quick survey](#) so I can begin to get to know you.

*The form asks for your NCAT email, and we will use this to verify your submitted.*

(10 pt) Beyond the survey, I want to take time to meet each of you in-person. Please schedule a 15min 1:1 meeting with me using this [Calendly link](#) for sometime within the first 4 weeks of the semester. Please complete the survey in advance of our meeting.

Write the date and time you have selected in `q3.txt`.

## Question 4: Course Tools Setup (20 pt)

---

In order to be successful in the course, you should get setup with the technologies we'll be using this semester.

(10 pt) One key technology is [Piazza](#). I encourage all students to actively participate. As part of this exercise, do the following: 1. Head over to this [post on Piazza](#). This will require that you already have a Piazza account and are registered for the course. If that's not true, make an account (using your @ncat.edu email) and register for the course using this [enrollment link](#). 2. On the post, you should "Start a new followup discussion". If you're the first student to do this, you should see one other follow-up discussion by myself above you. 3. The content of your post comment should give a brief introduction about yourself, and also include one fun fact about you. 4. After you've successfully made your follow-up discussion, you should note the name of the student who posted before you.

Include this name as the answer to this exercise in `q4.txt`.

(10 pt) Next up is Gradescope! We will use Gradescope to submit our assignments.

If you don't already have a Gradescope account, do the below: - First, head over to the Gradescope homepage. - Click on "Sign-up" near the top-right corner. - Select "Student" (not Instructor) - For "Course Entry Code" put **7GGN4X** - For school, search for "North Carolina Agricultural and Technical University" (it autocompletes). - Type in your name and NC A&T email address. - Leave "Student ID" blank, and sign-up. You will receive an email with a link to set your password.

Once you have your account and are registered, you'll be able to submit assignments. Upon completion, download your answers as a ZIP file and upload to Gradescope by the deadline. If you are using replit, you can download your ZIP file from the three dot menu next to the 'add file' button as shown in the figure below.

## Question 5: Resumes, Career Prep Module #1 (20 pt)

---

I hope most of you are preparing yourselves for an amazing career - be it going to graduate school, getting a job in tech, or doing whatever makes the most sense for you (any entrepreneurs?).

As we discussed in lecture, we'll be investing in career prep.

**(20 pt)** Please upload a copy of your current resume to [this form](#). In subsequent homeworks, we'll really dig in, but for now, that's it!

If you do not have a resume, that's okay! You can use one of these templates: [this one](#) (has my more in-depth comments), [this two](#), [this three](#), or [this four](#) and put together an initial draft.

As always, my door is open to provide support. We can brainstorm or workshop content should you want the extra pair of eyes!
